

# ISDN PROVISIONING SERVICE FOR CUSTOMERS IN THE USA AND CANADA

---

3Com offers a free ISDN line ordering service to customers in the USA and Canada. This service acts as a single point of contact with the telephone company. We strongly recommend that you use this service to order the proper ISDN lines for your 3Com equipment to ensure correct operation.

When you call 1-800-367-3869 the representative will ask you pertinent ordering information and place the ISDN order with your local telephone company. The representative provides you with the date of installation, service profiles IDs (SPIDs), and switch type information.

For technical support refer to our 3Com web site:
